

Fritz Winter Eisengießerei GmbH & Co. KG has been awarded the TISAX* label with the protection target "Availability high". With TISAX* (Trusted Information Security Assessment Exchange), the ENX Association supports the common acceptance of information security assessments in the automotive industry on behalf of the VDA (German Association of the Automotive Industry).

The TISAX assessments are carried out by accredited assessment service providers who provide proof of their qualifications at regular intervals. TISAX and TISAX assessment results are not intended for the general public.

Fritz Winter attaches great importance to the confidentiality, availability and integrity of information. We have taken extensive measures to protect sensitive and/or confidential information. In doing so, we are guided by the information security questionnaire of the German Association of the Automotive Industry (VDA ISA). The audit was carried out by an audit service provider, in this case the TISAX audit service provider TÜV Süd. The result can only be accessed via the [ENX Portal](#). You can access this portal if you are a TISAX participant yourself or by contacting us and registering on the TISAX portal.

*TISAX is a registered trade mark and is subject to the [ENX Association](#)
